# FACTORIES OF THE FUTURE AWARDS 2025

THANKS TO OUR SPONSORS:

## FRACTAL AWARD

Leadership in industrial plant transformation towards his digitization

## LA VANGUARDIA AWARD

for the best industrial equipment or system for the factory of the future

## SOTHIS AWARD

for the best automation and robotics project in an industrial plant

## MITSHUBISHI AWARD

to the most disruptive startup in the industrial sector

## EURECAT AWARD

for the best research and development of artificial intelligence applied in industrial plants

## BECOLVE AWARD

for excellence in sustainability, industrial eco-development and circular economy

# TALENT MARKETPLACE

**#LaIndustriaSinFiltros** framed the Talent Marketplace as an initiative to showcase to young talent a modern, technological industry full of professional opportunities—far from the stereotypes or “filters” that for years have distorted the sector’s image: low-skilled jobs, poor pay, monotonous tasks, or no future.

The campaign highlighted the true potential of today’s industrial and metalworking environment: quality jobs, competitive salaries, constant innovation, and a key role in the digital and sustainable transformation of the economy. An essential sector that needs to be rediscovered by new generations.
